SKILLS:

- Web Application & Website Development
 - Advanced knowledge of PHP, HTML/CSS, Javascript/jQuery, and MySQL.
 - Experienced with frameworks such as jQuery, Spring, and Smarty.
 - Worked with APIs from services like Twitter, LinkedIn, and CakeMail.
- Software Development
 - Intermediate experience in primarily Java, along with academics in C, C++, and C#.
- Worked in Unix and Windows environments w/ IDEs such as Eclipse, Xcode, Visual Studio, and Dreamweaver.
- High aptitude for adapting to new or unfamiliar technologies and languages.
- Excellent with customer relations and support services.

EXPERIENCE:

05/10-08/11 **Zift Solutions, Inc.** Durham, NC
Software Developer

- Web application development for the Zift marketing platform, based around PHP and Java.
- Javascript, AJAX, MySQL, JSP, and CSS worked with regularly.
- Utilized frameworks such as Spring, Hibernate, jQuery and Prototype.
- Personally setup a custom Oauth module to connect with services such as Twitter and LinkedIn.
- Made significant improvements to developer workflow and created custom modules for better debugging.
- First introduced a MVC-based pattern into the PHP app and began moving it to a more object-oriented structure.
 - This has become the basis of all new features, and old code continues to get ported to this new model.
 - The structure was also later implemented as the basis of an entirely new spin-off service.

09/09-01/10 **Geek Squad** Raleigh, NC
